# 1. Description

Over 4GB sized file is not supported in FAT32 file format, so need to use File\_Splitter\_4G program to make iso file in this case. These files are separated as .iso, .is1, .is2, ..... and those are emulated as 1 file when loading from iodd.

# 2. Install and Run

1) Download File\_Splitter\_4G program from <http://www.i-odd.com/>

2) Double click File\_Splitter\_4G.exe, and it's running without installing.

\* In Windows Vista, below account control window is pop-up if not logged in as manager account.

### 3. Main window composition

1) ISO -> iodd

2) iodd -> ISO

## 4. iso file separation

1) Select source iso file.

2) Select target directory.

3) Click Execute button.

← Before Splitting

← On Splitting

# 5. iso file merge

1) Select iodd drive

2) Select target directory for merged iso file

3) Click Execute button

← Before merge

← On merging

※ After splitting is succeeded, below window is shown.

Caution)

1. When splitting, if same file name is existed in the target directory, it splits after deleting that file.
2. When merging, if same file name is existed in the target directory, it overwrites that file.

※ Errors

\* if source and target directory are same

\* if file size is bigger than target directory size

\* if target directory for splitting or merging is Network drive

\* if iodd is detached from host device while splitting or merging

## 6. Delete iso file list

1) Delete all : All the file list is deleted when click Clear All button.

\* ISO -> iodd

Before delete all

After delete all

\* iodd -> ISO

Before delete all

After delete all

2) Delete selected list: After select file and click Delete Item (Multi select with Ctrl + mouse left button)

\* ISO -> iodd

Before deleting selected file

After delete selected file

\* iodd -> ISO

Before deleting selected file

After delete selected file

\* Multi select (Ctrl + mouse left button)

\* ISO -> iodd

\* iodd -> ISO

## 7. Corrective Action

Error type	Action
Same Directory Name	<ul style="list-style-type: none"> <li>Change target directory from source directory which has selected iso file.</li> </ul>
Disk Overflow !	<ul style="list-style-type: none"> <li>Delete unnecessary iso file in iodd.</li> <li>Delete unnecessary iso file in file split list.</li> </ul>
Can not select NETWORK DRIVE	<ul style="list-style-type: none"> <li>Change Split/Merge target directory, not to Network Drive</li> </ul>
File not found.	<ul style="list-style-type: none"> <li>Check cable connection between iodd &amp; PC.</li> <li>Change USB cable.</li> </ul>
Not detected .iso in iodd	<ul style="list-style-type: none"> <li>Check if it is FAT32 format</li> <li>Check iso file size is same as previous one.</li> </ul>
